Professional Summary

A skilled professional in software development and event talent management, with expertise in React Native, Node.js, and optimizing workflows. Eager to learn and grow, known for delivering high-quality results, managing teams, and coordinating large-scale events.

Experience

Freelance Talent Manager, Esport World Cup – Riyadh, Saudi Arabia Jul 2024 - Aug 2024

- Collaborating with producers to align talent involvement with event programming and production requirements.
- Facilitating communication across multiple departments to ensure seamless coordination and execution of event logistics.
- Coordinating travel, accommodations, and on-site logistics for talents to ensure a smooth and stress-free experience.
- Handling on-site crisis situations involving talents and implementing swift solutions to mitigate impact on the event.
- Analyzing post-event feedback and performance data to identify areas of improvement and develop future strategies.

Mobile Software Engineer, ET3Labs – Hazmieh, Lebanon Nov 2023 - Jun 2024

- Implementing responsive design principles to ensure applications function seamlessly across multiple devices and platforms.
- Conducting rigorous testing and debugging to identify and resolve performance bottlenecks, enhancing overall application stability.
- Developing and integrating RESTful APIs to streamline communication between front-end and back-end systems.
- Optimizing database queries and structures to improve application performance and data retrieval speed.
- Researching and adopting emerging technologies to stay ahead of industry trends and enhance development processes.
- Refactoring legacy code to improve maintainability and scalability, and updating the README for faster developer onboarding.
- Collaborating with cross-functional teams to ensure seamless application functionality and smoother workflows.
- Following Agile methodologies to enhance team efficiency and project delivery.
- Enhancing UI/UX for improved navigation and higher user engagement, ensuring a better overall experience.

Education

American University of Beirut, BS in Computer Science Sep 2019 – May 2023

Notable Projects

Sweep: Services App

Sweep is an app developed with Android in mind using Kotlin and Jetpack Compose, featuring a Flask backend and AWS services. Its goal is to connect users with local experts in pest control, cleaning, and similar services, promoting the employment of local labor forces.

RobinHood

Robin Hood is an app developed using React.js for the frontend and ASP.NET for the backend. It helps students by providing insights on courses, instructors, and access to previous exams, supporting their academic journeys.
